Electrical Engineering

Vol. 52
1933

REFERENCE INDEX

Volume 52 1933

Published by the American
Institute of Electrical Engineers
33 West 39th Street, New York, N. Y.

Annual Reference Index

To provide a comprehensive reference guide covering the contents of 12 issues of ELECTRICAL ENGINEERING for 1933, the style that proved popular for both the 1931 and 1932 Reference Indexes is repeated; this year in a different color so that it may readily be distinguishable. Material covered is presented in 5 major divisions, each arranged in alphabetical order and each item generously cross referenced. Divisions include:

1. Technical subject index embracing all non-departmental material published during 1933.

2. Index of authors and contributors including a listing of all signed articles.

3. Index of all news items pertaining to Institute activities.

4. Index of general—Non-Institute—news items.

5. A biographical division containing the names and page references for all persons whose activities were recorded either in the "personal" or "obituary" departments; including also all other entries of a personal rather than of a general nature.

Page Allocation by Issues

January 1- 72
February 73-146
March 147-218
April 219-290
May 291-362
June 363-442
July 443-522
August 523-594
September 595-662
October 663-734
November 735-806
December 807-942

Division I—Technical Subject Index

Accelerated Aging Tests on High Voltage Cable. Roper 371
Air Conditioning of Passenger Cars. Goodwin, Kerr. (Abs. 45) 85
Air Conditioning of Private Homes. McLenegan 366
Air Navigation, Radio Aids to. Green, Becker 307
Airplanes, Radio Direction Finder for Use on 779
Alchemists, The Battle of the. Compton 75
American Engineering Council
Consumption, Production, Distribution —First Progress Report (1932) (Letters)
Lennox 59
Shipman 136
The Balancing of Economic Factors —Second Progress Report (1933) ..... 293 (Letter)
Moody 429
Amplifier Oscillograph Has Many Applications 189
Analysis of Hydro-Regeneration, An. Allner 547
Annual Meeting of the Committee on Insulation. Whitehead 99
Application of Air Conditioning to Railroad Passenger Cars. Goodwin, Kerr. (Abs. 45) 85
Application of Phase Sequence Principles to Relaying of Low-Voltage Secondary Networks. Searing, Powers. (Abs. 50) 694
Arc Extinction Phenomena in High Voltage Circuit Breakers Studied With a Cathode Ray Oscillograph. Van Sickle, Berkey. (Abs.) 412
Arc Furnace, The 3-Phase Electric. Arnold 839
Arc Stability With D-C Welding Generators. Ludwig, Silverman. (Abs.) 417
Arc Welding, High Frequency for. Johnstone 14
Arcs, Vapor Stream in Vacuum. Mason. (Abs. 42) 702
Atoms as a Source of Light, The. Dushman 173
Attenuation and Distortion of Waves. Bewley 876
Automatic Control, Pipe Line Pumping and. Fies 29
(Automatic Stations) Improved Power Supply Betters Street Railway Service. Noertker 22
Automatic Train Control 698
Auxiliaries Electrified on Grace Line Steamships 95

B

Balancing of Economic Forces, The. Second Progress Report of Am. Engg. Council. (See also A.E.C.) 293
Battle of the Alchemists, The. Compton 75
Beauharnois Development of the St. Lawrence River. Lee 377
Better Instrument Springs. Carson. (Abs.) 414
(Bklyn. (N.Y.) Edison Co.) Switching at the Hudson Avenue Station. Gilt 868
(Boulder Dam) Corona Losses From Conductors of 1.4-Inch Diameter. Carroll, Cozzens, Blakeslee 854
Bridge for Precision Power Factor Measurements on Small Oil Samples, A. Balsbaugh, Moon. (Abs.) 48
(Buffalo, Niagara & Eastern Pwr. Co.) Fundamentals of Design of Electric Energy Delivery Systems. Johnson, Henry 831
Burlington Generating Station Improvements. Cisler, Gavit. (Abs. 416) 481

C

Cable, Accelerated Aging Tests on High Voltage. Roper 371
Cable, Communication by Carrier in. Clark, Kendall. (Abs. 416) 477
Cable Developments Discussed by Committee. De Mar 100
Cable, Impedance Curves of a Composite. Pupin 115
Cable of a New Type, Low Voltage Network. Anderson, Cheney 682
Cables, Deterioration of 24-Kv Power. Wyatt, Spring, Fellows. (Abs. 416) 450
Cables, Sheath Grounds Affect Traveling Waves in. Beck 238
Cables, Traveling Wave Voltages in. Brinton, Buller, Rudge 559
Cables, Voltage Regulation of Distribution. Searing, Thomas 554
Calculating Circuits, A New Method of. Kouwenhoven, Pullen 776
Calculation of Single Phase Series Motor Control Characteristics. Moore, Axtell. (Abs.) 46
Capacitance and Loss Variations With Frequency and Temperature in Composite Insulation. (Abs.) 52
Carbon and Graphite, Electrodes. Vosburgh 844
Carrier in Current. Clark, Kendall. (Abs. 416) 477
Cathode Electronic Tube Designations, Hot 170
Centralized Traffic Control and Train Control on the B. & O. Railroad. Davis, Dryden. (Abs. 43) 699
Century of Development in Industry and Engineering, A. Fleming 666
Century of Progress, The Engineer and A. Charlesworth 445
Chart for Estimating Costs of Units of Plant, A. Kirkwood 175
Chemical Processes, Electricity in. Fink 151
Circuit Breaker Design, Some New Ideas in. Church, Damon 247
Circuit Breaker Protection for Industrial Circuits. Lingal, Jennings. (Abs.) 124
Circuits, A New Method of Calculating. Kouwenhoven, Pullen 776
Circuits Applied to Relays, Non-Linear. Suits 244
Classification of Bridge Methods of Measuring Impedance. Ferguson. (Abs.) 414
Cleveland Terminal, Locomotive Operation at the. Craton, Pinkerton. (Abs. 45) 96
Committee Reports, Annual Technical Communication—Electrical, 1932-33 767
Electrical Machinery 391
Electrochemistry and Electrometallurgy —1932-33 706
Instruments and Measurements—1932-33, Electrical 766
Iron and Steel Production, Applications to 400
Power Applications, General in 1932 385
Power Generation 488
Power Transmission and Distribution—1932-33 746
Protective Devices—1932-33, Developments in 757
Transportation—1932-33, Electricity in 769
(Com. rept.) Impulse Testing of Commercial Transformers. Vogel, Montsinger 9
(Com. rept.) Modern Steel Tower Transmission Lines 243
(Com. rept.) Present Practice in Installation and Performance of High Voltage Lightning Arresters 394
(Com. rept.) Recent Developments in Electric Power Generation 488
(Com. rept.) Recommendations for Impulse Voltage Testing (Sporn) 17
Communication by Carrier in Cable. Clark, Kendall. (Abs. 416) 477
Communication, Electrical—1932-33. (Com. rept.) 767
Communication Facilities, Relay Systems Utilizing. Neher. (Abs. 50) 162
(Communication) Filters in Aetion. Lane. 813
(Communication) Impedence Curves of a Composite Cable. Pupin 115
(Communication) Joint Use of Poles With 6,900-Volt Lines. Bullard, Keyes 890
(Communication) Modern Railway Signaling. Reich, Wright. (Abs. 43) 712
(Communication) Production and Utilization of Micro-Rays 739
(Communication) Radio Aids to Air Navigation. Green, Becker 307
Communication Requirements of Railroads. Niesse, Thayer 11
(Communication) Short-Wave Radio to South America. Burrows, Howard 529
(Communication) Some Factors Affecting Inductive Coördination. North 551
Communication System on the Pennsylvania Railroad. Forshee. (Abs.) 42
Communication Systems of American Railroads. Niesse, Thayer 11
Communication, Transoceanic Radio. Beverage, Hansell, Peterson 331
(Communication) Vertically Cut Sound Records. Frederick, Harrison 183
Compensating Metering in Theory and Practice. Schleicher. (Abs. 413) 454
Components, Metering of Symmetrical. Shuck 536
Composite Systems, Steady State Stability of. Crary 787
Compression Type Low Voltage Air Circuit Breaker, A. Prince. (Abs.) 413
Conductor Vibration From Wind and Sleet. Den Hartog 240
Conductors of 1.4-Inch Diameter, Corona Losses From. Carroll, Cozzens, Blakeslee 854
Conductors, Skin Effect in Rectangular. Forbes, Gorman. (Abs. 49) 636
Construction Features of Special Resistance Welding Machines. Pfeiffer. (Abs.) 417
Control, Automatic Train 698
Control, Direct Selection Supervisory. Reagan. (Abs. 42) 81
Control, Electronic Devices for Industrial. Gulliksen. (Abs. 49) 106
Control for A-C Locomotives, Simplified. Giger. (Abs. 46) 613
Control for Gas-Filled Tubes, A Method of. Stansbury 190
(Control) Induction Motors as Selsyn Drives. Nowacki 848
Control, Light Sensitive Process. Alfriend. (Abs. 48) 601
Control of Voltage and Power Factor, Simultaneous. Blume, Woods 884
Control, Pipe Line Pumping and Automatic. Fies 29
Converters, Mercury Rectifiers vs. Rotary. Ward 194
Coördination of Insulation. Montsinger, Lloyd, Clem. (Abs.) 124
Coördination, Some Factors Affecting Inductive. North 551
Corona Loss at 220-330 Kv. Carroll, Cozzens 178
Corona Losses From Conductors of 1.4-Inch Diameter. Carroll, Cozzens, Blakeslee 854
Cosmic Rays—What Physicists Have Learned About Them. Darrow 221
Cost of Units of Plant, A Chart for Estimating. Kirkwood 175
Costs, The Segregation of Water Power. McCrea 313

(Cottrell) Equipment for Electrical Precipitation. Speight, Rydberg..... 337
Counterpoises for Transmission Lines. Fortescue..... 908
Cross Potential of a 4-Arm Network. Seletsky..... 861
Current and Voltage Wave Shape of Mercury Arc Rectifiers. Brown, Smith. (Abs.)..... 418

D

Deion Flashover Protector and Its Application to Transmission Lines, The. Opsahl, Torok. (Abs.)..... 415
Delivery Systems, Fundamentals of Design of Electric Energy. Johnson, Henry..... 831
Design Features of the Port Washington Power Plant. Post (Abs.)..... 416
Design of Electric Energy Delivery Systems, Fundamentals of. Johnson, Henry..... 831
Design of Resistance Welder Transformers. Stoddard. (Abs.)..... 341
Deterioration of 24-Kv Power Cables. Wyatt, Spring, Fellows. (Abs. 416). 450
